

IndianaMap Generate KML for Google Earth – User Guide

Overview

IndianaMap Generate KML/KMZ file from IndianaMap Web Map Services to use in Google Earth. <http://maps.indiana.edu/arcgis/rest/services>

With IndianaMap Generate KML/KMZ you can:

- Use the KML/KMZ file with Google Earth

Browser requirements

- Microsoft Internet Explorer, version 9.0 or above
- Mozilla Firefox, version 10.0 or above
- Google Chrome, version 12.0 or above
- Safari, version 5.0 or above
- Note: Google Earth should be installed on your computer

User Guide

Generate KML/KMZ Operation

- Open IndianaMap [Web Map Services](#)
 - Select one of the ArcGIS Service Folders from the list to display its Web Map Services
 - Click a layer within the folder to open the Web Map Service
- Do not click the Google Earth link at the top of the Web Map Service. That link is not supported.
- Scroll to the bottom of the services page
 - Click the Generate KML button to create a KML file to view in Google Earth
- In the Generate KML dialog box:
 - Add a Document Name
 - Check the Layers box beside the Layer title
 - From the Layer Options select "Vector layers as vectors and raster layers as images"
- Click the Generate KML button
 - Save the file on your computer. The file extension is KMZ, which is a compressed KML file. Google Earth can open KML and KMZ files.

Open the KML/KMZ in Google Earth

- Open Google Earth software on your computer

- From the toolbar click File
- Click Open from the dropdown list. Navigate to the KML/KMZ file you created and select that file.
- Zoom in to Indiana from Google Earth to view the IndianaMap Web Map Service data
